2023 Open Development Program

**East's Leisure & Golf
Ladies Development Program**

East's Open Golf Development Program

East's Open Development Program

The East's Open Development Program is a structured system that encourages golfers of all ages and abilities.

The program operates on most Fridays of the year and encompasses Introduction, Intermediate and Advanced golfers in a Clinic that caters for all levels.

The Open Development Program is operated by the Maitland Golf Factory, with the support of the East's Golf Committee and the East's Group.

When thinking of your golf equipment needs please support the Golf Shop that operates the program.

Friday Golf Clinic

The Development Golf Clinic is conducted on Fridays, as outlined in the schedule overleaf.

The Clinic runs from 11:30am to 12:30pm and is operated by Neil Dorsett, Vikki Wrigley, Hayden Gulliver and Michael Holden the Clubs Teaching Professionals.

The Clinic encompasses all levels from people just starting the game of golf to more advanced golfers. The cost of the Introduction Program is only \$100 for a six week course or \$20 per week for golfers wishing to participate randomly.

Participants in the Introduction section need not attend six weeks straight and can tailor their commitment to individual needs.

All equipment is supplied courtesy of the Maitland Golf Factory. If participants haven't got equipment the Shop will get you started.

New golfers can receive an Introductory pack including a club, glove and cap for only \$59. The pack is subsidized by the East's group and is part of it's dedication to the promotion of golf in the region.

Bookings for the Golf Clinic are essential and can be made at the Golf Shop or by email - proshop@embc.com.au or by calling 4933 4141.

On Course Instruction

At the completion of the six week Introduction Program new golfers can then embark on a pathway that includes an On Course Instruction Program.

New players progressing to the On Course Introduction Program, need to join the East's Leisure & Golf as a Social Member. This enables players to then play up to 10 times in this section of the Program before considering Golf Membership of the Club.

The On Course Introduction program runs on most Fridays of the year. The Friday program is outlined in the schedule overleaf and commences at 1pm.

The cost of the On Course Introduction Program is only \$10 per event.

East's provides a range of Membership options that suit the amount of golf that new golfers envisage they will play.

These options can include East's Fitness Centre Membership at reduced rates which can encompass the Get Into Golf Program as outlined on the next page.

Get Into Golf Program

Get Into Golf is Australia's national program to increase and promote participation in golf. Get Into Golf programs are available to new and existing golfers.

For new golfers, the program exposes participants to basic swing and putting golf skills, as well as movement and flexibility exercises, all in a social and supportive environment.

Existing golfers experience specific golf conditioning activities alongside skill development and refinement.

It is for people of all ages and abilities and coupled with East's Fitness Centre, can really help all participants achieve their golf and fitness goals.

"Fore" more information on the Program, including times and fees, talk to either the friendly Professional Shop or Fitness Centre Staff.

Equipment Needs

Golf clubs and the correct specifications that they need to be can be a confusing issue. There are a few considerations when fitting golf clubs, but once these are overcome it is pretty easy to get the clubs that are right for you.

A scale used by qualified Golf Professionals that measures a golfer's fingertip to the ground determines the length of golf clubs required by a player. When a golfer is addressing the ball correctly and once clubs have been fitted there is never a problem as to the length of a club.

Shaft flex can be broken down into Junior, Ladies, A Flex, Regular, Stiff and Extra Stiff. One of these flexes suits everybody depending on the speed of their swing. The kick point of the shaft then helps determine the height that a shot will fly.

Grip thickness is a big variable, but is easily adjusted by qualified Golf Professionals. The thickness required changes from person to person depending on a scale of finger length to palm size. Everybody is slightly different.

At the Maitland On Course Golf Factory we are well placed to correctly outfit all golfers with high quality golf equipment at the best prices.

For a more in depth explanation of club fitting and the components used in modern clubs drop into the Golf Factory and talk to any of the friendly staff.
